Edelweiss is a large financial services firm with presence in India's most scalable and profitable sectors. Our various businesses address the needs of multiple client segments and demographics. During the last few years, several of Edelweiss' "young" businesses have gained ground while the mature businesses have scaled up into sustainable business models with increased market share in their respective segments.

The **diversified revenue mix** has helped us achieve improvement in our performance on a sustained basis despite volatile environment.

**Speaking on the occasion, Mr. Rashesh Shah, Chairman and CEO, Edelweiss Financial Services Limited said:**

*"Despite intermittent periods of consolidation and volatility, our long-term growth trajectory continues. Our Consolidated PAT stood at INR 272 cr. PAT Excluding Insurance grew 56% to INR 322 cr.*

*The underlying economy is doing well and there is demand for credit. Current environment is a passing phase similar to what we had in 2013. Even though it is temporary and we are already seeing fresh borrowings and repayments starting to happen with situation expected to ease by March, it will be a key test on liquidity management of firms. We are a diversified financial services company – the benefits of this diversified business model will come out in market dislocations like the current one*

*Distressed Assets Business is seeing good traction. We are seeing recoveries from large ticket resolutions but also avenues for deployment – this growth will also come through fund route where we have already raised the largest distressed fund in India.*

*Liquidity-wise, we are in a stable position to meet all liabilities over next 6 months. We have always been prudent on the need to keep a liquidity cushion of around 12-13% of the borrowings which will help us in such times. In fact, our Liquidity Cushion and High Quality Liquid Assets (HQLA) together is more than 150% of our Q3 obligations. This will help us manage the liquidity environment while our diversified business model will help us cushion impact on profits*

*We will in the next six months continue to strengthen focus on asset quality and liquidity, long term business and building customer value while we remain relentless on heightening our risk management and corporate governance practices, technology investments, building foolproof systems and processes across businesses and strengthening our leadership pipeline. Once profitability adjusts, we will again come back to the growth path. We have gone through some of the steepest cycles in Indian financial markets several times and in every slowdown, we remain invested in building the organization to be fully prepared when tailwinds return. We remain confident of the India growth story and the role that financial services will play in it.*

*The long term trends in the democratisation of credit and continued financialisation of savings are irreversible. The biggest opportunity is going to be helping, catering and advising retail financial assets, the balance sheet of the household both on the borrowing as well as on the investing side. That is a 10-year or a 20-year trend and Edelweiss is very well positioned for that”.*
