Update on Liquidity Management

Oct 01, 2018

Edelweiss
Ideas create, values protect

Liquidity and Growth Outlook (1/2)

Liquidity

- Maintained a Liquidity Cushion of ~9-10% of balance sheet at all points of time
 - Current Liquidity Cushion at ~Rs 5,400 crores
- Medium and long term sources of funds are upwards of 68% of total balance sheet
- Adequate Liquidity Cushion currently positions us to meet all contractual liabilities over next 6 months even without roll-overs (slide 7)

Growth

- Short-term funding is seeing tightness, expected to improve in coming months
- Demand for credit is steady, however, growth may taper down by around 10 -12 percentage points for the market; NIMs likely to see an expansion
- In 2017, we communicated about Aspirations for 2020 in terms of asset quality, ROA and ROE. Based on current conditions, we do not see any reason to revise our Aspirations

Liquidity and Growth Outlook (2/2)

Profitability & Outlook

- Reduction in low-yielding High Quality Liquid Assets (HQLA) will have positive impact on RoA
- High RoA business is primarily long-term in nature and is expected to pick up in some time
- Our diversified model will help us navigate through the short-term challenges
 - 45% of the PAT contribution came from Distressed Assets, Wealth and Asset Management and Capital Markets business in FY18
- Tail-wind of ARC resolutions will help PAT growth
- We are currently not experiencing any deterioration in asset quality

Short-term assets are primarily low RoA in nature
