

## JOHN D. AND CATHERINE MACARTHUR FOUNDATION

---

Supporting creative people and effective institutions since 1970, the John D. and Catherine T. MacArthur Foundation has continued to influence lives globally by working towards the eradication of some of the world's most pressing development challenges such as – global climate change, nuclear risks, and need for local justice reforms.

In India, the Foundation's key focus since 2016, has been to support mitigation interventions that collectively seek to prevent global temperature rise to less than the scientifically-endorsed target of 2 degrees Celsius from pre-industrial levels. The Foundation joined EdelGive's funding fraternity to support its partnership with the India Climate Collaborative to build capacity of partners to pursue climate mitigation and adaptation activities.
