

OAK FOUNDATION

Formally established in 1983, Oak Foundation commits its resources to address issues of global, social and environmental concern, particularly those that have a major impact on the lives of the disadvantaged. With a particular focus on thematic areas of environment, child sexual abuse, housing and homelessness, international human rights, issues affecting women and learning differences, Oak seeks to be inclusive, flexible and attempts to engage with different points of view.

Oak Foundation supports the joint endeavour of the EdelGive-India Climate Collaborative alliance in mainstreaming climate communications in India. In addition to helping in increased dialogues between the government, businesses and philanthropies, the partnership aims to create public awareness about COP 26 and India's 2-degree commitment.
